PROFILE

A motivated and detail-oriented B.Tech student with a strong academic foundation and a genuine interest in technology and innovation. Passionate about applying classroom knowledge to real-world challenges and continuously enhancing technical and problem-solving skills. Recognized for adaptability, teamwork, and a positive approach to learning, with a clear focus on contributing effectively to organizational success while advancing personal growth.

PROJECTS

Churn Risk Profiler

- Churn Risk Profiler is an end-to-end customer retention intelligence platform designed for telecom operators and data teams. It transforms raw customer data into actionable churn insights — no code required after deployment.
- The platform trains and compares four machine learning models (Logistic Regression, Decision Tree, Random Forest, and XGBoost) on the IBM Telco Churn dataset, then surfaces results through a clean, interactive dashboard.

TravelMind

- Personalized Travel Recommendation System, also called TravelMind. The main objective of this system is to help users plan their trips efficiently by providing personalized suggestions such as must-visit places, hidden gems, restaurants, local food, cost estimation, and a day-wise itinerary. The user provides inputs like destination country, budget, travel mood, number of days, and user ID. Based on these inputs, the system generates customized recommendations.

KodexAI

- Developed a Flutter-Web and Node.js based platform that uses AI models (Llama, Mistral, Gemma) to generate optimized code, secure code, explanations, and risk assessments.
- Implemented a sandboxed Python execution engine and security validation layer to detect unsafe code patterns and prevent malicious execution.
- Built a real-time execution visualizer using Python tracing (sys.settrace) to display line-by-line execution flow, variable states, and function call stacks.

EDUCATION

2023 - 2027 GLS UNIVERSITY - FET

- Bachelor of Technology in Computer Science and Engineering (Pursuing)

2022 - 2023 HIGHER SECONDARY (CLASS 12TH)

- Little Flower School - 62 %

SKILLS

- Mathematical Aptitude
- Quantitative Reasoning
- Time Management
- Leadership
- Effective Communication
- Machine Learning
- Analytical Thinking
- Multiple Programming language(Python,Java, SQL, Flutter)
- CAD
- Git & GitHub

LANGUAGES

- English
- Hindi
- Gujarati (basic)

CERTIFICATIONS

- Certificate of Appreciation
- AWS Academy Cloud Foundation
- Java Certification
